# HABA education

inspired by children, created by experts

The holistic development of children aged between 0 and 8 years of age is the primary objective of HABA education. Our products are perfectly aligned to the needs and concerns of teachers. They find inspiration and materials for their day-to-day work: learning concepts, play and work materials that foster the senses, creative material and movement material for indoors and outdoors – whether in nurseries, kindergartens, pre-schools or learning centers.

We have compiled this variety of products for you as an ambitious school supplier from our many years of experience.

## Member of the HABA Family of Companies

HABA education is part of the HABA family of companies in Bad Rodach, Germany. This is guided by a fundamental principle: taking responsibility for tomorrow today. For us as a modern family company, sustainable action is central to our corporate philosophy. We attach as much importance to sustainability in production at our site in Germany and by our partners abroad as in the development and selection of products for the international market. For almost 80 years, the company's brands have been developing and marketing toys, furniture, clothing and many other products for the world's nicest target group: children, families, kindergartens, schools and social facilities. More than 2,000 employees work at the company's headquarters in Germany and at other locations, including in the USA, France, Hong Kong and India, to meet their widely differing needs and requirements.

### Wehrfritz

**FOSTER – DEVELOP – EXPERIENCE**  
... is a full-range supplier for social facilities (from nurseries/kindergartens to schools through to therapy facilities) and offers a wide assortment of furniture, materials and play-ground equipment for indoors and outdoors.

### HABA®

**INVENTIVE PLAYTHINGS FOR INQUISITIVE MINDS**  
... produces first-class toys and games, gifts and children's room accessories and sells these internationally.

### project

raum.schafft.wissen

**SCHOOL AND BUILDING furnishing**  
... is an individual furniture manufacturer and innovative outfitter with exceptional conceptual expertise in learning spaces for all educational institutions.

### JAKO-O

**BEST FOR KIDS**  
... offers a sophisticated range of children's clothing, children's room furniture, toys and more and has everything that families with children up to 10 years of age are interested in.

Little  
children  
are ...

...enthusiastic, imaginative, creative, committed, investigative and curious, flexible and courageous without fear of failure – they simply love to learn! These characteristics relate to skills which are vital for success in the 21st century.

### **Our Vision**

is children growing up in a supportive environment which encourages them to unfold their inherent talents, because their surroundings have a decisive influence on this development – first the parents and the family, later also daycare, kindergarten and school. If children find a stable basis for their roots, enough stimulation for growth and plenty of room to develop, they can grow up with a joy all of their own.

### **Mission Statement**

We believe: All children deserve products that are unique in terms of concept, design, play value and development character. This is why, with our products, we support all educators in creating space to grow. And these educators need experts like you who provide the best educational tools. We support you by building your portfolio with our unique learning resources grown from 80 years' of market-leading experience in Germany and enriched by the profound knowledge of experts from the fields of education and science.

# Our mascot Axl

Our mascot is Axl, the axolotl. This extraordinary animal is a water-dwelling salamander and occurs only in two lakes in the volcanic basin near Mexico City. The tiny animal with the friendly appearance is as unique as our products and will accompany them through our catalog!

## Unique products. . .

**Our classic Building Kit Wagon**

...is one of our most important and most traditional products: it has featured in our product range since 1974 and been sold more than 20,000 times! This means that – statistically – every third kindergarten in Germany owns one.

**High educational (play) value Food Pyramid**

Discover the right approach to food by playing. Or simply fantastic for toy shops! Comes with detailed instructions with many playing options

**Rainbow Salad**

**Multi-functional and flexible Arch Ladder**

Slide, swing or play table

**Just right for kindergarten kids Dwarf Crawl Tunnel**

What our designer says: "I loved building caves even as a child. We would have loved a Dwarf Crawl Tunnel like this. Perfect for keeping a lookout in the mountain. Big enough for all of us. With a fantastic cave, which would have been our secret hideaway, and the cool purple tunnel."

# Motor Development

Movement comes naturally to people and it is only by moving that we learn about the world around us. When children run, climb, swing, use ropes or dance, they feel what their body is doing and are aware of every step. Team games that involve lots of moving and playing are fun and strengthen the bonds within the group.

**Children also have to learn fine motor skills, manual dexterity and hand-eye coordination.** They need an educational environment that offers a wide range of stimulating opportunities.

### Emil's Little Garden - 25 pieces

Emil the little gardener has a big task: He would like to build a house and create a beautiful garden. Who will help him with it? What's special about this beautifully designed pegging game is that children as young as 2 years old can creatively redevelop Emil's little garden again and again. In doing so, a wide variety of fruit trees, flowers, and vegetable made of wood and fabric are used that show the origin of our food. The bottom of the packaging serves as the playing surface.

Type: pegging game. Contents: 5 beds, 2 trees (1 x large, 1 x small, printed on both sides: 1 x in blossom, 1 x with fruit), 1 house (4-piece), 2 each of flowers, red radishes, white radishes, and lettuce, 1 mole, Emil, 1 bench, 3 fences. Material: wood, partly color stained and printed fabric. Dimensions: Bottom of the packaging (= garden area) W 36.5 x H 11 x D 24.5 cm; Emil approx. 6.5 cm high; house W 8 x H 11 x T 3.8 cm; radish approx. 6 cm high.

Swing Thing, at ground level: children can always get in and out by themselves

## 158536 Swing Thing

The Swing Thing is an enormous triangular swing. Strap loops allow different suspension and attachment variations at a variable height. Secured by the net, babies from their first month can already be swinging in it. It turns into a cuddly cave for smaller children. Suspended as an inclined plane, it becomes a challenging wobbly playground – balance training that is lots of fun for older children. Depending on how rigidly the Swing Thing is attached, children can seesaw or swing in it.

Material: Robust fabric made of 100% polyester; base of swing is a wood panel padded on both sides with foam; 3 suspension loops reinforced with webbing; 3 carabiners, 1 swivel hook. Dimensions: edge length 1 x 1 x 1 m, 3 suspension loops 180 cm from the bottom of the swing. For 1- and 3-point suspension. Can hold up to 100 kg. GS-tested in accordance with current applicable laws.

### Features:

- different suspension and attachment variations
- for children from 1 year
- can hold up to 100 kg

## 133570 Chilly Maxi - 11 pieces

Ultra-comfortable hanging chair with removable padding. Ideal for swinging, resting and retreating.

Load capacity: 100 kg. Material: 100% polyester, robust and waterproof. Delivery includes carabiner, rotational hook and hanging rope. Seat dimensions: 45 x 45 cm. Total length: 200 cm.

### Features:

- comfortable seat for relaxing and “hanging out”
- can easily be attached to the ceiling

## 055024 Rope Ladder and Connector - 8 pieces

With the rope ladder connectors (= wooden rungs), a mobile climbing system can be assembled from two or more rope ladders and changed over and over again to make it look different or vary the level of difficulty.

Load capacity: max. 50 kg. Material: beech, tear-resistant nylon. Wooden rung dimensions: L 80 cm, Ø 3 cm. Set with 2 wooden rungs, 4 strap connectors, 2 rope ladders, item no. 055642.

### Features:

- enables a wobbly climbing experience without a climbing wall
- strengthens physical awareness

**Horse reins - 1 piece**

Fun movement game between rider and horse. The horse lead can be flexibly adjusted to the size of the players by hook and loop fastener on their backs and shoulders. Thanks to the hook and loop opening on the reins, two players can "ride" at the same time. If the tension on the lead is too great, the hook and loop fasteners can be opened. With little bells.

Material: robust, doubly sewn artificial leather. Dimensions: length of reins approx. 120 cm. For children with clothing size up to size 10.

**Features:**

- encourages movement games with horse and rider
- hook and loop fasteners can be opened when tension is too great

# Sensory Development

The senses are our window to the world. They enable us to perceive the abundant world around us. We then piece these experiences together to form our image of the world. Experiences that involve several senses at once are particularly memorable. Children first learn about the world immediately around them and then expand their horizons.

**Using and playing with a wide range of materials with different textures and functions helps children to build sensory experiences and develop an understanding of the world.**

# Learning Concepts

Humans have a natural inquisitiveness about the world. For children, everything they come across is fundamentally interesting and exciting. Early Years education is about capturing and building on children's curiosity and enthusiasm for learning new things. Concepts and resources developed with experts in the field are used to teach children the fundamentals about shapes, surfaces, patterns, and numbers. A wide range of games develop their working memory, cognitive flexibility, and impulse control.

**Children are then ready for learning ... and for life, as they will need these core skills in many different situations.**

### Willy's Number Houses, Set - 114 pieces

Illustrate the numbers from 1 to 10. 15 houses with 1 to 5 holes for the plugs and 1 house with no hole for zero. The numbers 6 to 10 are shown by stacking or placing two houses next to each other (5 + 1, 5 + 2, 5 + 3 etc.) Note: The numbers after 6 can also be depicted as duplexes if you order 5 additional roofs.

Material: wood, all edges are rounded, coated in saliva-resistant paint; flags made of fabric.

#### Features:

- large set consisting of houses, roofs and flags
- encourage playing, counting and math
- the windows on the houses look like dice dots
- the flags symbolize the quantity of windows shown

## THE NUMBER HOUSES

The windows on the number houses are grouped like the pips on a dice and represent the amount aspect. The windows can be closed or opened again with the wooden pegs. The flags bring order to the Land of Numbers. In the house of the number 1, everything can be found once, in the house of the number 2 twice and so on.

## THE NUMBER GARDENS

The number gardens form the basis for Willy's World of Numbers. They represent the numbers in form of geometric shapes: the 3 as triangle, the 4 as square etc. Each number from 1 to 10 has its own number garden.

- made of high-quality felt
- non-slip bottom

**133934**

### Willy's Number Gardens - 10 pieces

## Willy's Number World Magnet Game - 174 pieces

With Willy's number world for hanging up and decorating, doing math is really fun! The two wall panels create a 100 x 70 cm number world with number gardens that can be redesigned over and over again with the matching magnets. This makes learning and understanding the numbers up to 10 easy. There are number houses, numbers from 1 to 10, animals, the fairy "Forget me not", the goblin "What a muddle" and many other magnets.

Contents: 2 coated metal plates (each W 50 x H 70 cm), approx. 172 different magnets, folding box, fastening materials.

**Willy's Number Meadow - 180 pieces**

The huge "number meadow" teach children the numbers from 0 to 100. In the small flowerbeds, flowers can be industriously planted, picked and symmetrically mirrored. The number goblin "What a muddle" and number fairy "Forget me not" accompany children on their first steps into the world of addition and subtraction, as well as recognition and naming of numbers and quantities. Short introduction stories help children remember what they've learned. Includes instruction booklet with lots of game ideas.

Material: felt and wood. Dimensions: number meadow 55 x 55 cm, printed on both sides; flower beds 27.5 x 5.5 cm, printed. Includes storage bag.

**Features:**

- teaches basic understanding of the numbers from 1 to 100
- lots of game variations thanks to the color and number dice as well as play figures

## Starting from scratch

### Brick on brick – Building one’s own learning universe

Children today are growing up in a mechanized, automated, and digitalized world. In order to meet these challenges, children need competencies such as creative thinking, self-regulation, and individual responsibility as well as the ability to work together. The OECD study “Starting Strong 2017” demonstrates that early childhood education is important for developing these competencies. This approach was already clear to Friedrich Fröbel. With his founding of the first kindergarten in 1840, Fröbel laid the cornerstone for an innovative early childhood education concept. In his day, he was considered to be a rebel, yet today he is as relevant as ever. Rediscover Fröbel’s ideas with us and adapt them to our time! Fröbel’s “Spielgaben” (Gifts) are both simple and sophisticated at the same time. Inspired by them, we have further developed Fröbel materials, which are captivating with their clear shapes and flexible creative techniques. The materials always build from the simple to the complex, offer children a variety of design ideas, and cre-

ate many learning opportunities. In free play, the children themselves determine which topic they work on and at what speed – depending on their personal interests and abilities. According to the principle of child-centered education, the children are accompanied with sensitivity. This principle of self-education was especially important to Fröbel, since self-directed action and thinking are the foundation for the growth and maturation of strong personalities. Children can later independently participate in the environment of modern life and help shape it with self-confidence. In this respect, the principle of self-education is the prerequisite for critical thinking, one of the competencies of the 21<sup>st</sup> century.

*Getting children into shape for the future means stimulating, encouraging, and empowering them in a self-directed way.*

#### “Fröbel “Season Tree” - for 1 tree

A window picture for the whole year! The season tree changes with nature and offers quite a sight in spring, summer, fall, and winter. Simply separate the tree trunk and stick it on the window. Depending on the season, circles, semicircles, and triangles are separated and cut out and decorated as leaves, flowers, apples, or snowflakes around the branches. The shapes stick on both sides on all smooth surfaces and are smudge-proof and reusable.

Contents: 12 transparent adhesive films in 10 colors, partially stamped and printed; instructions. Dimensions: base of tree trunk 44.6 x 33 cm. Level of difficulty: easy.

#### Fröbel thought on the Season Tree:

- Encourages talking about nature throughout the seasons
- Fosters understanding for aesthetics and geometry with the help of basic geometric shapes
- Fosters fine motor skills, differentiation of shape and color, and creativity
- For variable designing of a seasonal window decoration

## Fröbel Building Kit Bridges and Cylinders - 24 pieces

Contents: 6 bridges (15 x 5 x 5 cm), 6 small cylinders (Ø 5 cm, 5 cm long), 6 large cylinders (Ø 5 cm, 10 cm long), 6 half cylinders (5 x 4.8 x 2.4 cm), with template cards. Material: beech wood, unfinished, smoothly sanded.

## From the simple to the differentiated

Children best receive wooden blocks in units that build one on top of the other. All blocks have a uniform basic size. Children first explore the blocks in free play. With each building kit, more complex shapes follow, such as prisms, bridges, and cylinders for an increasingly differentiated play. The children can form numerous shapes and structures with many variations from the

block shapes. Fröbel called these *Forms of Beauty*, *Forms of Life*, and *Forms of Knowledge*.

Using their own hands, children understand the basics of geometry and mathematics. Through play, they open

up for themselves the world and its regularities.

### Forms of Knowledge

First insights into mathematics and geometry

### Forms of Beauty

### Forms of Life

# Developing creative potential

## Clear shapes and colors are inspiring

Children are always following their inner impulses. Their innate curiosity and creative potential only have to be "teased out" and maintained. So that they can fully realize their urge to discover and their delight in designing, they need a reduced learning environment. Focusing is the key word. The aesthetic materials are limited to what is essential. These feature clear colors and simple geometric shapes with a high recognition value.

According to Fröbel, creative materials such as the arranging materials or their contemporary version as window films are highly stimulating, encourage learning processes, and allow knowledge to develop. Children can delve deeply into their self-selected play learning environment. Here the true wealth of the creative materials is revealed: With each playful experiment, variations grow from simple shapes into complex structures.

Children will not only conquer the land of imagination but also gain casually or through focused stimulations essential knowledge of mathematical symmetrical shapes and colored aesthetic patterns and forms of life. And they will become acquainted with something valuable for the future: concentrated, structured, and independent work on an object.

*Gradually through play, children develop their aesthetic sensitivity, wealth of ideas, and creative power.*

- Fosters comprehension of aesthetics, symmetry, and geometry
- Weaving and counting train basic mathematical knowledge
- For varied crafting projects
- Already beveled for easier weaving

*already beveled for easy weaving*

**Weaving à la Fröbel**

**Weaving following Fröbel – with language support**

You begin with easy, repeating weaving movements, which can be increased in difficulty, culminating in independent weaving. According to Fröbel, this encourages children to become self-acting and to develop their whole creative potential. The focus is on the exemplary and on counting, as becomes clear from the language support by the teacher:

- “Thread one down, one up...” (simple pattern)
- “Thread three up, three down...” alternating with
- “Thread one up, one down...” (complex pattern)

These are just examples for counting verses repeated over and over again (“Always up and down”). Through playful use of these verses, children are introduced to arithmetic and develop an initial idea of symmetry and shapes. As a result of having to skip one, two, or three weaving rows, children also learn to keep to fixed structures and rhythms.

Weaving à la Fröbel fosters in children basic mathematical knowledge as well as language expression by the constant repetition of the language support.

# Children in control of themselves

## FEX - Fostering executive functions

Applied brain research findings

At home and in preschool, children quickly give into their first impulse, forget established rules, become loud or defiant ... This is a very normal behavior at this age. They must first develop self-regulation. In order to do so, children need, in addition to well-qualified teachers, a variety of playful and meaningful opportunities related to everyday life that they can practice. The ability to self-regulate is based on the executive functions. A whole range of abilities is meant by this: acting purposefully, blocking out distracting stimuli and thoughts, and responding flexibly when a situation changes. It has been proven in several studies that executive functions are important because you get through life better with them. They are also critical for success in learning. And they can be

trained with sports, music, theater, (manual) work ... and with special games. At the same time, children learn skills, attitudes, and actions that will enable them to have better control of their life.

Director of the ZNL Transfer Center for Neuroscience and Learning at the University of Ulm

# Cognitive Development & Numeracy

As they develop, children are constantly faced with new cognitive challenges. Babies learn primarily by observing and imitating. They try out the same things again and again, for example dropping an object or pushing something over and watching it closely. Around the age of three, children start to perceive the difference between themselves and the world around them; this is a stage of rapid cognitive development. They use their developing speech to ask questions about the world.

# Construction, Science & Discovery

Building is a crucial part of children's play. Children are interested in different materials depending on their age and developmental stage.

Children in daycare, for example, build towers out of blocks and watch them fall down, while older children prefer specific structures such as houses, castles or cars.

Using a wide range of materials that encourage children to build and experiment in different ways helps them to progress well and develop. They can fulfil their urge to explore and create their own new, significant experiences.

# Wooden Building Blocks

All blocks are the same size, enabling creative, varied play!

- Different shapes

Cuboids, cones, cylinders, cubes, and many other shapes

- Building blocks

Natural and multicolored

- Wood is a natural material

All blocks are made from wood

- Identical dimensions

All building blocks, except the Fröbel set, measure 4 cm.

This means that all the sets can be combined with each other.

# Loads of Cubes *pattern thinking*

Large quantities of the same material encourage children to create their own structures and shapes. This lets them structure the chaos, and create patterns and mathematical motifs. Suitable for creating 3D shapes like dice or rolls, or geometric shapes like circles, squares and regular triangles. Children love stacking cubes and building them into towers, walls, larger cubes etc. By letting children's imagination run wild and simply letting them build or arrange whatever they want they "dive into mathematics". The mathematically identical values

also mean that the numbers and their relationship to one another can be represented. This lets a collection of cubes be clearly translated into numbers and number structures, for example  $10 \times 10$ . A tower with 5 cubes is very clearly only half as tall as a tower with 10 cubes. The cubes therefore represent the regular composition of our numbers. The smallest unit is 1 (= 1 cube), which you can see and use to create all other numbers.

# Communication & Psycho-emotional Development

**From the moment we are born, communication plays a huge role in our lives, enabling us to interact with one another.**

Our social environment - parents, siblings, friends and teachers - is a major part of our speech and language development. Children who receive appropriate support when their speech is developing build more neural connections. Having plenty of opportunities to apply what we have learned, communicating using language or discussing things with each other form experiences that we carry with us for our whole lives. Language, after all, is one of the main means of expressing our feelings. The formation of our personalities, and their stability, is thus closely linked with speech and language development.

# Imaginative Play & Room Accessories

Children love trying out different roles for themselves. Whether it's a princess, knight, policeman, doctor or animal. **Their imagination is constantly** stimulated based on their age and the world around them. Role play is a key component of children's development and has a strong effect on them. As most games are played with friends, teachers or parents, these games quickly become part of the children's social interactions. This thus encourages children to try new patterns of behavior, ways of speaking, and creative ideas. Everyone involved shows different emotions and behaviors; these all require a reaction.

**Role play enables children to immerse themselves in other worlds and characters and express their ability to act independently.**

# Special Needs

Every person is an individual with their own character, behavior, opinions, preferences, and needs. Educators are particularly challenged by children with special needs, but what counts as special? Children can be very relaxed and unprejudiced when dealing with each other's quirks. The important thing is that all children are looked after, challenged, and encouraged equally.

**Using resources appropriate for the child's age and their developmental stage as well as their strengths and weaknesses facilitates strong, formative progress, enabling them to grow into a capable, healthy adult.**

# Therapy Doll "Toni"

Example: Vojta-therapy reflex turnover

146824

## Therapy Doll "Toni"

Ideal training doll for learning manual techniques, Vojta Therapy and the Bobath concept. The head of the neutral doll rotates +/- 110 degrees; the limbs are quilted at the joints and therefore fully flexible. Thanks to the elastane in the warp-knit fabric, the body structure can be put back in its original position. Large field of application: in speech therapy, ergo therapy, child psychology, psychiatry and geriatric care, and as a soft and cuddly doll for playing with.

Washable at 40°C in the gentle cycle. Cover: cotton warp-knit fabric with 5% elastane; hair made of mohair/cotton blend, firmly sewn in, tear resistant. Filling: siliconized cotton wadding. Size: 65 cm. Delivered without clothes. Fits normal baby clothes in size 62/68.

### Features:

- versatile: as a doll and for a wide variety of therapies
- head rotates by +/- 110°
- fully flexible limbs
- developed by a physiotherapist

- especially suitable for people suffering from dementia
- can be hung up with carabiner
- patented and manufactured in Germany

148204

## Tactile Braid

The grasping braid enables activation through "grasping": with its soft, pleasant fabric and tactile stimuli in the form of small, securely worked in objects, it arouses the interest and curiosity of people suffering from dementia and encourages them to touch and explore. The grasping braid can be used while sitting or can be mounted over the bed for bedridden people. For hanging or fastening – only to sturdy objects! – a carabiner is required. Order at the same time: carabiner hook (item no. 644255). If using without fastening, remove the carabiner.

Material: soft fabric. Washable by hand. Dimensions: approx. 64 x 10 x 6 cm.

(As each item is unique, the objects worked in and the fabric colors may vary.)

# Creativity & Art Materials

Creativity is closely linked with curiosity and the desire to make something new with the resources and materials available. When children have sufficient time and a stimulating environment, most will find it very easy to awaken their creative energies. They will quickly try new things and design something themselves, putting their ideas into practice and developing them. Children are proud to show what they have made, often giving their creations away and thereby gaining in self-confidence.

**The knowledge that they have made something using their own imagination and their own hands gives them the strength to face future challenges.**

# Fit for the future with the

The creative development of children in the first seven to eight years of life is characterized by experimentation with colors and shapes. In the next steps they refine their gross motor skills and become more and more aware of their surroundings. This enables them to depict people, animals and everything around them increasingly realistically in their pictures or figures. This is followed by the development of refined, abstract work, which requires perseverance and action planning.

Together with educators and pupils of Coburg Academy for Social Pedagogy we have developed the creative learning path. This illustrates the timing and content of the individual development phases, creative techniques suitable for stimulating children and the appropriate products from our range.

The ages given are averages. The development of the individual child may of course differ from this.

### Painting Apron - 3 pieces

Always fits thanks to the Velcro fasteners that ensure that the width of the apron can be adjusted in no time and that the rolled-up sleeves stay put. They also close the painting apron at the wrist, back and neck.

Material: nylon, washable at 30°C. Dimensions: L 60 cm, W max. 40 cm, sleeve length 45 cm.

#### Features:

- 3 handy painting aprons to protect against paint spots
- adjustable width and sleeve length
- comfortable width at the neck

## Primar Paints

### Primar Paints

Transparent, silky water-based paints. Mixing them with a matt craft paint creates a pearlescent effect. Brilliant as a wood glaze, too! The rich-colored paints will not run, can be mixed together, and are durable and smear-proof when dry. They can be washed off smooth surfaces and hands, and can be removed from most fabrics using cold, soapy water. Size: 750 ml.

Each bottle, je 750 ml

- 141708 yellow

### 1 - 3 years: Smearing and smudging phase

In this early childhood phase, the focus is not on artistic creation, but on the sensory experience. Painting freely with their hands, feet and fingers, the child explores paints and other materials without worrying about the result. It is only at the end of the phase that the child succeeds in regulating force.

#### Deco Varnish Spray - 300 ml

With the varnish spray, wood and cast figures quickly and cleanly receive a wafer-thin, uniform, colorless coat, which is water and weather resistant and does not contract. Adheres to almost any substrate.

### 3 - 4 years: Scribbling phase

This phase begins as soon as children can hold and guide a pencil or similar. It ranges from indiscriminate strokes to cluster-like structures, through to the first differentiated illustrations. The painting movements are very sweeping and come from the whole body. In addition to perception, hand-eye coordination and motor skills are trained.

### Modeling Clay

A soft modeling clay that doesn't have to be pre-kneaded first! It is permanently elastic (doesn't harden even for a longer storage period), hardly discolors, and is one third lighter than similar modeling clays. It consists of the purest raw materials (no chemicals, no plasticizers), and is dyed with food-safe colors.

500 g each color.

- 074437 6 x 500 g (red, green, yellow, blue, brown, white)
- 077300 red
- 077301 green
- 077302 yellow
- 077303 blue
- 077304 brown
- 077305 white

### Snails Modeling Set - for 3 snails

They are quickly modeled and decorated and a beautiful decoration for the windowsill. Height approx. 15 cm.

The packages contain sufficient material to complete 3 snails: plaster bandages, wooden rods, wooden balls, Styrofoam balls, and decorative material. Includes instructions.

Age: 5+ Level: 

## 7 - 8 years: Learning maturity

In this phase, children are able to plan their actions. They develop perseverance and ambition to realize their own ideas. Basic math, increasing spatial awareness and fine motor skills are the basis for a wide range of creative techniques, even more difficult ones.

Creative Tools for:  
Wood Carving & Linocut

### Molding Strips

Wooden toy and more to make yourself. Manual skills are fostered during measuring, sawing, sanding, and painting. For sawing, we recommend a saw board so that everything is nice and straight. So that the figures and animals stand up, they should be sawed off at least 1 cm thick. Pieces for hanging up can be thinner.

Note: Since the strips come directly from the manufacturer, the length will vary (approx. 40 - 60 cm). Depending on the thickness of the sawn off pieces, each molding will produce 30 - 50 pieces. For comparison: Rabbits 3 - 6.5 cm tall. Material: wood.

- A** 073090 Farm, 7 strips
- B** 073643 Easter animals, 4 strips
